

SONY

UWP-D

Create the ultimate sound with Digital Audio Processing Technology

Why choose Sony UWP-D series?

Sony UWP-D series offers all you need for High Quality audio recording across applications such as weddings, corporate and ENG.

It features a great range of transmitters and receiver kits, as well as boasting the first dual-channel receiver with 2 independent channels and an additional stereo input for a wired microphone.

Digital Audio Processing provides high quality sound, improving transient response performance between the UWP-D transmitter and receiver that provides impressive natural sound quality compared to conventional analogue wireless systems.

Features

The URX-P03D dual channel receiver and URX-P03 single channel receiver both cover a **470MHz-695MHz frequency bandwidth** and offer easy connection using the SMAD-P3D or SMAD-P3 MI shoe adapter.

The UWP-D receivers are **easy to set up** by utilising a scan function to identify free and occupied channels, ensuring hassle free use.

The True diversity reception system* achieves **highly stable RF transmission** from two adjustable receiving antennas, each with its own RF circuits. The receiver uses Antenna Diversity if 2-channels are in use.

The URX-S03D is the first two-channel slot-in receiver in the UWP-D Series that **fits directly into Sony XDCAM** slots and features a 45° display for simplicity of control in either shoulder or tripod operation.

The UTX-B03 belt-pack transmitter offers wide frequency coverage with **up to 72 MHz bandwidth** across a wide range of channels with easy-to-use features including an automatic channel setting function, IR sync, USB connection for power supply and line input availability.

The UTX-M03 hand-held transmitter has a **changeable head function** to allow use of any 3rd party capsule.

The UTX-P03 plug-on transmitter provides **48V phantom power** and connects to any microphone with 3 pin XLR connection.

The SMAD-P3 and SMAD-P3D offers wireless connection between the UWP-D receiver and Sony camcorder or DSLR. Audio signals can be transmitted from the wireless receiver, providing hassle free use and **eliminating any need for cables**. In addition the receiver can draw power from the camcorder, unifying power management.

***for URX-P03 and URX-S03D models only**
