Product Description

The Light Box 30x120 is a Bowens Mount Narrow Rectangular Softbox with a front aperture of 30x120cm. Its surface area and slim form factor make it ideal for transforming hard point-source LEDs into clean, linear edge lights and key lights for portrait and product photography.

Its lightweight 4-rod construction and Bowens Mount speedring allow for quick setups and make it ideal for Bowens Mount point-source LEDs, such as the Aputure LS 120d and LS 300 series, as well as the amaran COB 60/100/200 series.

The Light Box 30x120 also includes two diffusion strengths, both 1.5 and 2.5 stops, as well as an inner baffle allowing users to fine-tune their intensity and light quality.

Target Audience

The Light Box 30x120 is ideal for cinematographers and photographers who need to emulate linear lights using Bowens Mount point-source LEDs. Its slim and narrow design and light control grid are optimal for lighting a wide area with minimal spill, and is perfect for edge lights, often used in portrait and product photography.

What's in the Box
