STUDIO X3

Talent Light with Natural Quality

Litepanels **Studio X LED** Fresnels, engineered by world renowned broadcast lighting professionals Quartzcolor, deliver high-performance, directional, bright white light with precision spot to flood beam control and consistent quality.

Natural talent light with perfect skin tone rendering is achieved with high output Bi-Color COB LEDs to produce superior white light. With no variation in quality at any dimming level from 0-100% or across the adjustable CCT range from **2700°K to 6500°K**, Studio X Bi-Color Fresnels perfectly match ambient and practical set lighting to show talent in a naturally realistic light.

The Studio X3 Bi-Color 100W has a 5" lens with a wide spotto-flood beam angle range of $8^{\circ}-53^{\circ}$. With a maximum output of 5,240 lux at 10ft/3m (spot 5,600K), its output at 3,200K is similar to a 500W traditional tungsten Fresnel. Advanced thermal management ensures 50,000+ hours of LED engine life, while individual burn-in and calibration tests ensure quality and consistency.

With high-quality, single source wrap-around illumination, Studio X is the perfect choice to light your talent – naturally.
