

# New Product Announcement

Date: August 22, 2008

Another **NEW** product from Dedolight

## DLHM4-300DMX Tungsten light head with DMX control

The fourth generation DLH4 light head is the single best selling professional precision light source in the world. This new generation incorporates the award winning Asherics<sup>2</sup> lens combination and zoom focus. The many power options and unprecedented range of accessories make it a uniquely versatile instrument.

The self-contained Dedolight DLHM4-300DMX has the same optical and technical features as the DLH4. Additionally it works with an integrated electronic

power supply and is dimmable via DMX control. The DLHM4-300DMX may also be dimmed through built in push buttons on the light head without a DMX controller.
