INTRODUCTION

This wireless intercom system contains 1 Base Station and supports up to 4 Beltpacks. Base Station and Beltpacks support moving–coil single–sided mics and condenser mics. It can be selected through the menu, which is convenient to switch between different usage scenarios.

The Base Station equipped standard 4–wire audio interface, which can achieve two Base Station or another intercom systems connection. Also, it can increase the quantity of Beltpacks and wireless intercom range.

The Base Station supports 7–36V DC wide voltage and F970 battery power supply. Each Beltpack is powered by rechargeable lithium battery or Base Station's USB interface. Base Station supports 2 channels analog voice input/output. It has user–friendly audio amplitude adjustment menu.

FEATURES

- Carrier–grade voice quality,1000ft working range
- 1.9GHz/2.4GHz frequency band, supports frequency configuration for different territory
- Full–duplex wireless communication
- Base Station support up to 4 Beltpacks simultaneous call, and 2 channels analog voice input/output
- Support 4–sgement 3.5mm earphone call
- Base Station equipped with 2 external antennas
- Base Station support 7–36V DC wide voltage input
- Support U flash disk or USB automatic upgrade
- Beltpack powered by built–in lithium battery, will provide more than 8 hours of battery life
- Industrial metal shell, stable and reliable
- Provides full list of accessories

FCC STATEMENT

- 1, This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference received, including interference that may cause undesired operation.
- 2.Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF WARNING STATEMENT

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
